- is as easy as measuring fever
- stores up to 30 measurements
- connects to the server via infrared stick and computer at any time and anywhere
- connects to the server via Bluetooth and cellular phone
- transfers to the desktop via infrared stick

direct transfer to the computer

## Mobile technology – a heart beat ahead.

Cardiac dysrhythmia and mental illnesses often require intense medical care by the doctor. Modern telemedicine is not just limited to the medical practice, but can be applied wherever life happens to take you: clue medical enables the patients themselves to carry out measurements at any time and anywhere. By means of an ECG, the mobile event recorder simultaneously records heart rate and heart rate variability (HRV), and shows the current stress level – for an optimal diagnosis and therapy control.

### clue medical – from the measurement to the result in just a few minutes ...

- secure data transfer to the server
- simple access to the server – at any time and anywhere
- possibility to transfer data to the medical centres
- simplified graphics for patients, detailed presentations for doctors

Measurement – fast and simple

## Modern telemedicine for doctors and patients - clue medical.

### A reliable partner – for doctors and patients.

#### clue medical – ideal for patients ...

- optimal therapy control in the case of cardiac dysrhythmia
- "diagnostic outstation" for medical data collection
- early recognition of stress and danger of burnout
- the perfect companion for a preventative medicine and fitness programme
- increases both, the quality of life and the quality of medical care

#### clue medical – ideal for doctors ...

- shortens the diagnosis period
- saves on costly examinations, such as 24-hour ECG or EPU
- enables the diagnosis of hitherto undocumented illnesses
- facilitates monitoring in the case of stress, burnout r depression
- is suitable for use as a loan or rental device for doctors
